System.IO.StreamWriter
- by Harsha Vardhan

System.IO.StreamWriter

- Used to write text-based content to a file.
- Can write the string directly to the file; no need to convert into byte[].

StreamWriter
StreamWriter sw = new StreamWriter("c:\\sample.txt"); **sw.WriteLine("some content");** **sw.Close( );**

Members of System.IO.StreamWriter

Properties	Constructors
• No Properties	• StreamWriter(string path)

Methods
• void Write(string content) • void Close()
